

***The ROHO® DRY FLOATATION® ISOLETTE MATTRESS***  
by ROHO, Inc.

The ROHO ISOLETTE Mattress is designed to provide protection to infants who are at high risk for ischemic ulcer development. The two (2) inch high air cells conform and shape to the infant providing a low pressure, non-friction/shear total contact environment ideal for the at-risk infant. In addition, the ISOLETTE has been successfully used post-operatively to enhance perfusion. The ISOLETTE is a non-powered, adjustable overlay so it can be used in any standard hospital or home based isolette.

## Features and Benefits

**2" Cell Height:** The LOW PROFILE cell height of the ISOLETTE offers protection from possible tissue breakdown while offering the added benefits of portability from care setting to care setting.

**Adjustable:** Shapes to the infant addressing their specific tissue needs.

**Lightweight:** The ROHO ISOLETTE is approximately six (6) pounds making it easy to transport and handle and minimizes fatigue of the individual.

**Durable Neoprene Rubber:** Flame resistant and resistant to urine, oils and medicines. Easily cleaned with soap or water and can be steam autoclaved. Product can be repaired extending the overall life of the cushion.

**Ventilation:** Individual air cells allow for air circulation between the cells.

**24 Month Limited Warranty**
